## **Intro to Imaging, Radiation Safety, and FDA Compliance**

This introductory course covers the basics of X-Ray imaging physics and instrumentation, safe operating principles when around radiation-generating equipment, and teaches the ALARA (as low as reasonably achievable) concept. A discussion of the testing and performance requirements to achieve FDA compliance will explore the tests, test equipment required, test setups, and data interpretation.

**Course Dates: 2/18/2019 – 2/22/2019**
